

UTKARSH RAJ

B.TECH INFORMATION TECHNOLOGY STUDENT

Kolkata, West Bengal | +91 6203662371 | utkarshbrb6@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Information Technology student with knowledge of Java, JavaScript, React.js, Node.js, Express.js, MongoDB, MySQL, and REST APIs. Built full-stack web applications with authentication and role-based access. Solved 200+ DSA problems in Java and seeking an entry-level software development role.

EDUCATION

Techno Main Salt Lake, Kolkata

2023-2027

B.Tech in Information Technology | CGPA: 7.56/10

TECHNICAL SKILLS

Languages: Java, JavaScript

Web Development: HTML, CSS, React.js, Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Authentication: JWT, Bcrypt

Tools: Git, GitHub, Postman

Core Subjects: Data Structures and Algorithms, DBMS, OOP

PROJECTS

CollabX

[GitHub](#) [Live](#)

Technologies: Node.js, Express.js, React.js, MongoDB, JWT, Redis

- Built a team collaboration application with user authentication, workspaces, channels, messaging, task boards, and member invitations.
- Implemented JWT authentication and role-based access for admin, manager, and member roles.
- Reduced repeated workspace and profile API response time from approximately 800-1200 ms to 200-400 ms by caching frequently accessed data with Redis.
- Integrated GitHub webhooks to display repository activities such as pushes and pull requests inside workspace channels.

Gramin Seva Portal

[GitHub](#) [Live](#)

Technologies: Node.js, Express.js, MongoDB, JWT, Multer, Cloudinary

- Built a multi-role service portal where users can register, manage profiles, and submit service requests.
- Created REST APIs using Node.js, Express.js, and MongoDB for user and service-related operations.
- Implemented JWT authentication and role-based access for protected features.
- Added profile and document upload functionality using Multer and Cloudinary.

YouTube-Inspired Backend

[GitHub](#)

Technologies: Node.js, Express.js, MongoDB, Cloudinary, JWT

- Built REST APIs for videos, likes, comments, subscriptions, playlists, and watch history.
- Implemented user registration and login using JWT authentication and Bcrypt password hashing.
- Used Cloudinary for video and image storage and MongoDB for application data.
- Designed separate MongoDB models for users, videos, comments, subscriptions, playlists, and history.

ACHIEVEMENTS

- Solved 200+ DSA problems in Java across arrays, strings, linked lists, stacks, queues, trees, and sliding-window patterns.
- Built a multi-role Student Management System with a six-member team for Smart India Hackathon, contributing to role-based dashboards and team development.
